

## KRASNOYARSK REGION

The Krasnoyarsk Territory is the second largest subject of the Russian Federation, occupying 2,366.8 thousand square meters. km (or 13.86% of the country's territory). The Krasnoyarsk Territory is part of the Siberian Federal District. The region borders the Republic of Sakha (Yakutia) and the Irkutsk Region in the east, the Republic of Tyva and the Republic of Khakassia in the south, the Kemerovo and Tomsk regions in the west, as well as the Khanty-Mansiysk and Yamalo-Nenets Autonomous Districts.

## GEOGRAPHICAL POSITION

Krasnoyarsk Territory is located in Central and Eastern Siberia. Occupies 13.86% of the territory of Russia. It stretches for almost 3000 km from north to south, and its maximum width from west to east is 1250 km. The region is located in the basin of the Yenisei and Ob rivers. In the north, the region is washed by the waters of two seas of the Arctic Ocean – the Kara Sea and the Laptev Sea.

## *SYMBOLS, DAY*

### **Coat of arms of the Krasnoyarsk Territory:**

Lion on a shield with a golden shovel and sickle. The lion symbolizes power, courage, bravery and generosity. The tools in the lion's paws indicate the historically main occupations of the region's population: a shovel symbolizes mining (an emblem of construction), and a sickle is a symbol of agriculture.

### **Flag of the Krasnoyarsk Territory:**

The shield is surrounded by golden oak and cedar branches intertwined with a blue ribbon. Above the shield there is a gold pedestal with three small shields - two gold and one silver with the image of order ribbons. The azure pillar on the shield symbolizes the Yenisei River.

**Day: December 7**

**Capital: Krasnoyarsk**

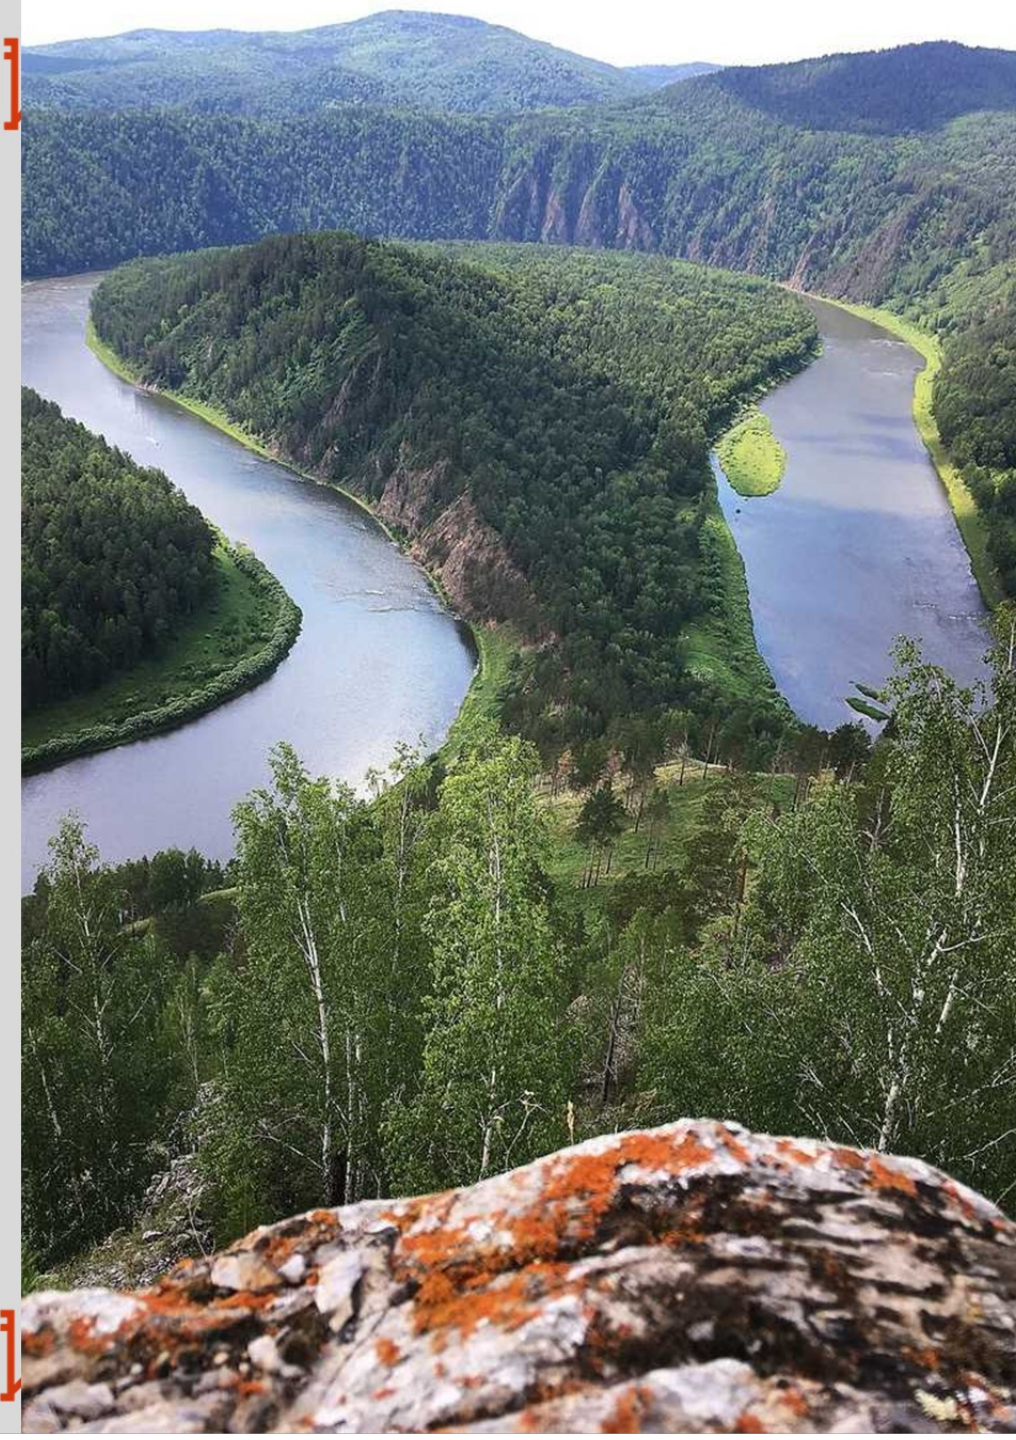

# NATURAL RESOURCES AND CLIMATE

The most important natural resources of the region are: hydropower, coniferous forests, corals, gold and rare metals, oil, gas, iron and polymetallic ores, non-metallic minerals.

The natural conditions of the western region are very diverse. All landscapes found in Eastern Siberia are represented here: mountain forests, steppes and forest-steppes, subboreal forests and taiga, tundra and forest tundra, permafrost layer. Iron ores.

The climate of the Krasnoyarsk Territory is sharply continental, characterized by strong fluctuations in air temperature throughout the year. Due to the large extent of the region in the meridional direction, the climate is very heterogeneous. The northern and central regions of the region, where a small population lives, are characterized by a continental climate with long winters and short summers. It's hot in the center, but cool in the north.

## POPULATION

The population of the Krasnoyarsk Territory, according to Rosstat, is 2,846,120 people. (2024). The population density is 1.20 people/km<sup>2</sup> (2024). The urban population is 79.7% (2022).
