

# **KHANTY-MANSIYSK AUTONOMOUS OKRUG - UGRA**

It is located in the northwest of Asia in Russia. Geographically it is part of the Tyumen region. It is part of the Ural Federal District. The area is 534.8 thousand km<sup>2</sup>. The administrative center is Khanty-Mansiysk. The territory consists of: 9 districts, 16 cities, 24 mountain villages. type.

## GEOGRAPHICAL POSITION

**Khanty-Mansiysk Autonomous Okrug (Yugra) is located in the center of Russia and the Eurasian continent.**

**From west to east, the territory of the region stretches for 1400 km from the eastern slopes of the Northern Urals almost to the banks of the Yenisei, and from north to south - for 900 km from the Siberian Uvalas to the Kondinskytaiga.**

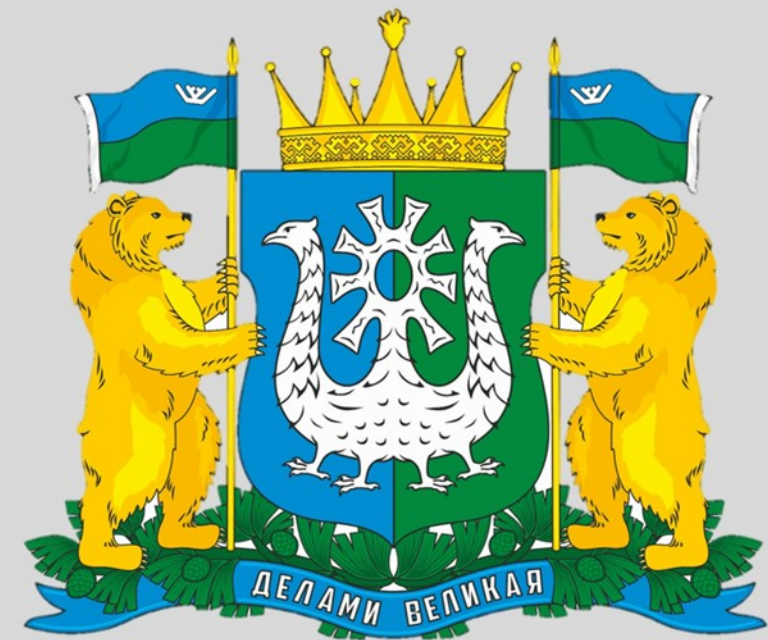

**In the north, the district borders with the Yamalo-Nenets Autonomous Okrug, in the northwest - with the Komi Republic, in the southwest - with the Sverdlovsk Region, in the south - with the Tobolsk and Uvatsky districts of the Tyumen Region, in the southeast and east - with the Tomsk Region and the Krasnoyarsk Territory.**

## SYMBOLS DAY

The coat of arms of the Khanty-Mansiysk Autonomous Okrug - Yugra has the following heraldic description: In a dissected azure-green field, a silver Cat Uhup Hole bird with two eagle heads on long necks, four paws and a tail visible between the heads and necks, similar to a peacock, widely dissected into colored fields. The shield is crowned with a golden land crown with seven visible teeth, the middle of which is complemented by a flame, and a belt with a national ornament on the edges. The motto "GREAT DEEDS" is inscribed in silver letters on an azure ribbon.

The flag of the Khanty-Mansiysk Autonomous Okrug - Yugra is a rectangular panel divided horizontally into two equal stripes (the upper one is blue-blue, the lower one is green), completed vertically with a rectangular white stripe.

In the upper left part of the canvas there is a white element from the coat of arms of the Khanty-Mansiysk Autonomous Okrug - Yugra.

Day: December 10

Capital: Khanty-Mansiysk

## NATURAL RESOURCES AND CLIMATE

Khanty-Mansiysk Autonomous Okrug has large reserves of iron ore, hard and brown coal, bauxite, copper, zinc, lead, tungsten, molybdenum, chromium, barite, manganese, rare metals and phosphorites. All deposits of solid minerals are suitable for open-pit mining. The presence of such minerals allows the Autonomous Okrug to develop new sectors of the economy.

The climate of the area is sharply continental, with severe, prolonged (about 9 months) winters and relatively warm summers. The average temperature in January is  $-9.2^{\circ}\text{C}$ , the average temperature in July is  $+18.1^{\circ}\text{C}$ . Precipitation falls 400–550 mm per year. The growing season is 120–130 days.

## POPULATION

Russians make up 68.1% of the population, Tatars - 7.6%, Ukrainians - 6.4%, Khanty - 1.3%, Mansi - 0.8%, Komi - 0.2%, Nenets - 0.1%, etc.

The demographic situation is significantly better compared to the average for the Russian Federation due to a younger age structure and economy. factors. Since the early 1990s, the population has increased by more than 350 thousand people.
