9. We need a _____ before starting construction on the new site.
10. I will _____ the updated schedule on the company website.
11. The _____ specifies all the tasks that need to be completed today.

25.2. Reading

Ex. 1. *Read the text.*

Effective communication is crucial on a plumbing site to ensure that all tasks are completed efficiently and safely. Before beginning any work, it is essential to obtain a **building permit** to comply with local regulations. Once the permit is secured, workers can **carry** the necessary blueprints to the meeting room for a detailed planning session.

During the project, team members use **two-way radios** to communicate instantly about any changes or issues that arise. It's important to **confirm** all appointments for inspections and deliveries to avoid delays. The **rough-in sheet** is a vital document that shows where all the plumbing fixtures and pipes will be installed, ensuring accuracy in placement.

If there are any design modifications, the project manager should **consult** with the engineer to assess the feasibility of these changes. Additionally, staying in touch with suppliers is crucial; you should **contact** them regularly for updates on delivery times for essential materials.

Modern technology plays a significant role in site communication. Workers often use their **smartphones** to manage schedules and access plans on the go. Important details and updates are often shared via **email**, allowing for quick dissemination of information.

As the project progresses, it's important to **post** the updated schedule on the company website so that everyone involved is aware of the timelines. Finally, the **work order** lists all the tasks that need to be completed, helping to keep the team organized and focused on their responsibilities.

Ex. 2. *Answer the questions.*

1. Why is effective communication crucial on a plumbing site?
2. What must be obtained before beginning any work on the site?
3. How do team members communicate instantly during the project?
4. What document ensures accuracy in the placement of plumbing fixtures and pipes?
5. Who should the project manager consult with regarding design modifications?
6. How do workers use modern technology to manage schedules and access plans?
7. What should be posted on the company website as the project progresses?

25.3. Communication

Ex. 1. *Make sentences using the following words.*

1. email/me/latest
2. regularly/news/website
3. social/great/connect
4. new/blog/posts
5. forum/place/discussions
6. contact/details/page
7. welcome/feedback/services
8. information/helpful/find
9. team/ready/assist
10. subscribed/newsletter/yet

25.4. Writing

Ex. 1. *Draft an email to confirm the details of a work order for plumbing repairs, utilizing the target vocabulary to discuss the required rough-in sheet and any additional instructions needed for the job.*
